## SPECIAL EDITION

### 2023 MILLION MILE AND MEDALLION BANQUETS

Marten takes pride in announcing the induction of our newest 2023 Million Mile and Medallion inductees.

This year we inducted fifty 1-Million Mile Drivers, three 2-Million Mile Drivers and two 3-Million Mile Drivers.

In addition to our Million Mile awards, Marten inducted seven Bronze Medallion Drivers and one Silver Medallion Driver. The Medallion award honors drivers who drive less than 80,000 miles per year, but they routinely operate in congested city traffic and are in and out of customer facilities multiple times a day. The criteria for the Bronze Medallion is eight years accident free and a Silver Medallion is sixteen years accident free.

This year Marten was honored to celebrate these drivers as well as 111 of our 2020, 2021, and 2022 past award recipients. The banquets were held at the Atlanta Evergreen Resort in Tucker, GA, the Dallas Omni in Dallas, TX, the Holiday Inn in Eau Claire, WI, the Arizona Grand Resort in Phoenix, AZ, and the Sheraton Indianapolis Hotel at Keystone Crossing in Indianapolis, IN.

Drivers pictured left to right; Back Row - Daniel Hartman, Robert Gardner, Matthew Stevens, and Bob Salerno. Middle Row - James Tomsic, Kevin Rowe, Robert Evans, Wendell Smith, John Henry, Jack Abel, and Marcus Howard. Front Row - James Wooten, Charles Henley, and Roy Johnston.

Drivers pictured left to right; Brian Hights, Jodie Pilsner, George Glover, Michael Nix, Albert Bass, Jimmy Hudson, Michael Wallace, James Jackson, Lance Rollason, Danilo Reyes, Darren Reese, Richard Long, and Gregory Buchanan.

Marten Transport would like to take a moment to thank our Million Mile and Medallion Club drivers for taking the time to do the difficult job of driving a commercial motor vehicle safely every day. By taking the time to do the job safely we are able to recognize your accomplishments.

We continually add technology to help improve the job and protect you. Several safety features added to help improve the driving experience have been the sleep apnea program, electronic logging devices, collision avoidance system, grill guards, automatic transmissions, forward-facing cameras, lane departure system, blind spot detection and most recently the addition of disk brakes. All these features have been added to continually improve the job for all drivers. Adding the technology is only part of the process as it takes all of you using the technology correctly to continue to safely do the job.

We added electronic logging devices before they were mandated. This allowed the hours worked to be reflected and tracked in real time. This made the job safer by not allowing multiple logbooks. The sleep apnea program was implemented to help everyone get the restorative sleep they need. This program was implemented at no cost to the drivers that require it. We care about your health and safety and are pleased to be able to continue to offer this program to all drivers that need it so they can get the restorative sleep they need.

The addition of the forward-facing cameras was and continues to be very beneficial. With the addition of these cameras, we have been able to save drivers careers. The camera footage has been used to confirm adverse events that happen. By doing this we have proven that the other vehicle was at fault and not the Marten driver saving the driver's career.

With the addition of the collision mitigation system as a company we have been able to reduce the frequency and cost of rear-end accidents. The lane departure warning system has done the same thing with our lane departure accidents.

By adding the disk brakes this shortens the stopping distance of the equipment. The stopping distance with this additional safety feature is reduced anywhere between 17% and 33%. This will depend greatly on weight, speed, and road conditions.

We have a weather warning alert system that was implemented to help you stay safe out on the road. This only works when you as the driver use the information provided. This program, along with our inclement weather pay, allows you to stay safe without sacrificing your paycheck.

Ultimately, the most important safety system in our trucks is the driver that takes advantage of the systems and technology provided. A driver that avoids hazards and drives defensively. A driver that mile after mile continues to maintain total control and focus on the job at hand. A driver that thinks not only of the safe delivery of the cargo but for the safety of those traveling around them. We thank you for all your safe miles.
